

**Fantastic Fairy Tales**

Through exploring various traditional tales the children will be consolidating their key writing skills, including capital letters, full stops, spaces between words and letter formation. The children will also be using their imagination to create new characters and stories.

**The Beebot Project**

The children will be involved in a cross curricular project this term. They will be making 3D and 2D maps using their DT and Art skills and they will practise programming a robot to navigate the map following a given route.

# Ready, Steady, Go!

This term we will be looking back over the year at the things we have achieved and preparing ourselves for starting Year 2. We will explore the different groups we are part of and learn more about what it means to belong.

**Look at us grow**

This term the children will be learning about how their bodies grow. They will name many different body parts and investigate their five senses. The children will look back at their own stages of development and appreciate how many milestones they have already reached.

Taking part in Sports Week alongside the rest of the school will allow the children to work collaboratively as a team.

**Key Vocabulary**

**Where?**

castle	forest	cottage
Greece	Japan	England
countries	continents	world

**When?**

long ago	once upon a time	
past	present	future
